Email Address: _____

⊖ LTA Member \$ 660.00

⊖ Non Member \$1,100.00

⊖ Other Industry \$ 770.00

*I have enclosed my cheque/money order.
Also enclosed is proof of membership*

TruckCare

QUALITY MANAGEMENT FOR LIVESTOCK TRANSPORTERS

TruckCare
Quality Management for Livestock Transporters

Australian Livestock Transporters Association

Background

TruckCare is a quality management program especially developed for livestock transporters. It is fully auditable and was put together by a pilot group of livestock transporters in South Australia. The program is built around the quality assurance principles contained in international standards and also uses hazard analysis of critical control points. TruckCare is designed to integrate with other quality programs including CattleCare, FlockCare, National Sleyard Quality Assurance and TruckSafe.

The program is aimed at raising awareness, introducing quality management, implementing a quality management system which can be audited by customers, or by an externally qualified auditor and integrating with customers or road transport quality assurance programs.

Changes to TruckCare

As from 1 January 2005 changes have been implemented by the TruckCare Committee to the TruckCare Program. These changes include:

- ♦ audit timings – the 18 month compliance audit has now become a 24 month compliance audit, compliance audits will be undertaken at 6 and 24 month intervals
- ♦ sticker charges – a nominal charge (GST inclusive) has become necessary to recover the printing costs of the TruckCare stickers: 0-15 stickers - \$25, 16-50 stickers - \$50, 51+ stickers - \$75
- ♦ annual fee charges – to recover the costs of administering the program it has become necessary to charge an annual fee of \$165 (GST inclusive). For new operators joining the program the annual fee for the first 12 months is included in the joining fee.

Endorsed by:

- ♦ AQIS
